# Acknowledgment:

I would like to express my special thanks of gratitude to my teacher. **Ashima Ma'am** who gave us the opportunity to do this project on the topic, '**Educational Website**'. This gave me opportunity to learn more about HTML, CSS features and enhances my creativity.

I would also like to Thanks to my Teammates for being helpful and supportive.

## About Us :

The people who visit our website are the most important part of what we do. We provide learning resources to students for free. We continue to provide academically sound content of the highest caliber and welcome input from our users as we

address issues of equity, diversity, inclusivity and representation. Since we know there are many different approaches to teaching and education, we develop our materials to complement these different philosophies across subjects and grades.

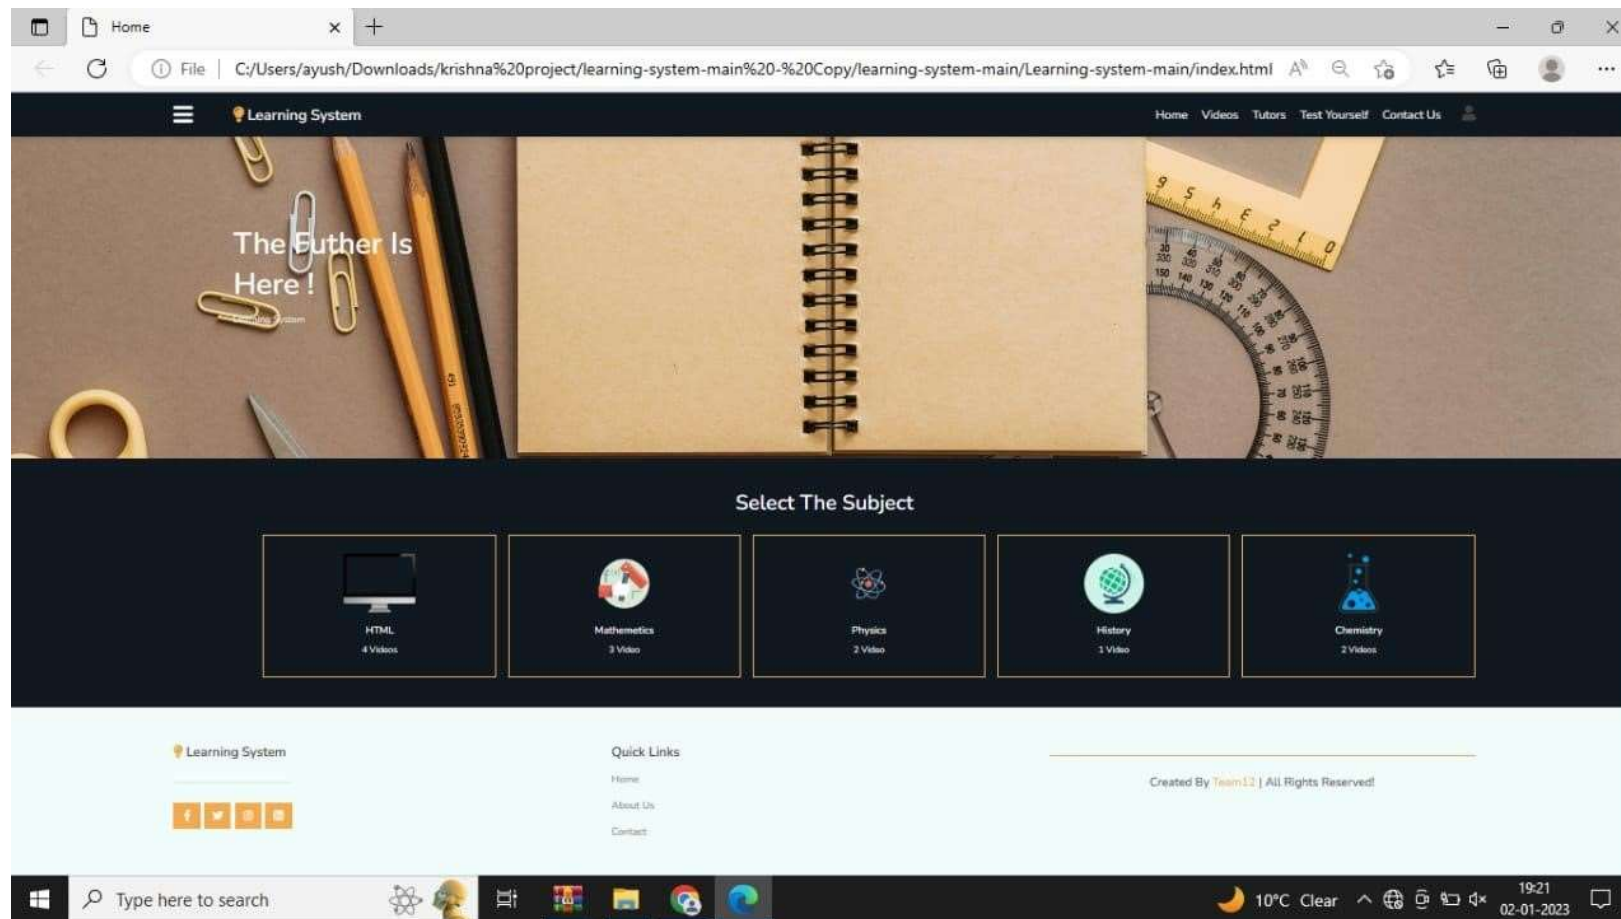

## Technologies Used:

- HTML (Hypertext Markup Language)
- CSS (Cascading Style Sheets)

## Features:

- We work according to the guidelines of the Government.
- You can easily access our course from any anywhere.
- We always have backup team at hand for your support.
- You can plan a career counselling session with our team.
- Clear Navigation.
- We provide Skill based courses with great team for skill development.
